

Questions responds:

To reviewer suggestion ID 02942858

Thank you for your great suggestion for revision of our manuscript. The arrows has been used in figure 2B, 2C, and 2D for more demonstration. The title has been changed to Vedolizumab in Crohn's disease with rectal fistulas and presacral abscess.

To reviewer suggestion ID 02544125

Thank you for your great suggestion for revision of our manuscript. The IHC staining figure regarding CMV infection of this patient has been added to the manuscript.

To Science editor

Thank you for your advised. The manuscript has been revised and the case presentation section has been re-written. Please check if the format meet the requirement of your journal. Please feel free to email me if you have any questions.
