### Extragastrintestinal stromal tumor of prostate

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6194793>

The current case report describes an extremely rare case of primary GIST originating from the prostate. This diagnosis was based on radiological studies, pathological findings, and immunohistochemical results. However, due to the fragmented nature of the specimen, the exact size of the mass and the completeness of resection could not be determined.

### Specialized stromal tumors of the prostate: a ...

<https://pubmed.ncbi.nlm.nih.gov/16723846>

Specialized stromal tumors of the prostate encompass stromal sarcoma and stromal tumors of uncertain malignant potential (STUMP). As a result of their relative rarity and lack of long-term follow-up, the prognosis of STUMP is unclear. We studied 50 cases of STUMP and stromal sarcoma with regard to their clinical presentation and follow-up.
