

I sincerely thank the editors and reviewers for their valuable advice. I would like to respond to your comments point to point.

1. With regard to the puncture and drainage of bile leakage, I have added the following description in the manuscript: The effusion was completely drained out after CT-guided puncture and catheter drainage one week later. A total of nearly 400 milliliters of ascites mixed with bile were drained.

2. The patient began her first follow-up one month after the operation, and received 6 courses of XELOX chemotherapy every 21 days since then.

3. Two references recommended by reviewers have been added to the manuscript.

4. Original pictures was uploaded with the same name PowerPoint

5. I have re-write the "Case Presentation" section, and add the "FINAL DIAGNOSIS" , "TREATMENT" , and "OUTCOME AND FOLLOW-UP" sections to the main text according to the Guidelines and Requirements for Manuscript Revision.

6. I have added PubMed numbers and DOI citation numbers to every reference list all authors of the references. We failed to find the PMID of articles 5, 12 and 19 references in the Pubmed.

7. The title of the manuscript was shortened to 18 words
