

Dear Chief Editor of WJG,

It is our pleasure to submit our revised version of the manuscript entitled **“Barriers for resuming endoscopy service in the context of COVID-19 pandemic: A multicenter survey from Egypt”** according to the proposed comments.

We have addressed all the science editor comments. The manuscript was already sent to an English editing company before submission and the certificate was submitted. However, according to the science editors comments, we did another quick language polishing round.

We added the authors contribution, manuscript highlights and edited the references as required. Of note, the reviewers gave positive comments and didn't suggest specific revisions or changes. We provided the required forms as well as the high resolution original images of the figures.

Sincerely,

On behalf of the authors,
Omar Elshaarawy, MD.PhD
