[neuroangio.org/.../pulsatile-tinnitus-venous-sinus-diverticulum-stenting](#) ▼

Here is a more nuanced **case** of venous **pulsatile tinnitus**. Venous **sinus stenosis** is perhaps the most under-recognized cause of **pulsatile tinnitus** today. See Venous **Sinus Stenosis** page and Cases 1 and 2 of venous **sinus stenosis** and **stenting** for more information. Venous **sinus stenosis** is frequently associated with post-stenotic dilatation which ...

Sep 01, 2017 · RESULTS: Severe bilateral **transverse sinus** stenoses were more frequent in patients with idiopathic intracranial hypertension than in controls ($P < .001$), but there was no significant association between **transverse sinus stenosis** and **pulsatile tinnitus** within the idiopathic intracranial hypertension group. **Sigmoid sinus** dehiscence (right- or left-sided) was also more common in ...
