

## Format for ANSWERING REVIEWERS

November 10, 2013

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 6011-review.doc).

**Title:** Integrated Technologies in post-genomic era for Discovery of Bladder Cancer Urine Markers

**Author:** Sanaa Eissa and Marwa Matboli

**Name of Journal:** *World Journal of Clinical Urology*

**ESPS Manuscript NO:** 6011

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) Needs to be extensively proofread by native speaker of English

*We have tried to proofread the review by native speaker of English and highlighted all the corrections.*

(2) The manuscript is interesting and well written; however, a linguistic revision would be desired. The authors may add a paragraph on diagnostic methods using analysis of "whole cells" in the urine like the method using Raman spectroscopy. Additionally, it would be interesting if the authors would add a paragraph or a diagram depicting their view on how a potential marker should be evaluated and what is necessary to bring it to clinical use.

*A linguistic revision has been made, A paragraph has been added regarding identification of tumor cells by RMI. A paragraph on evaluation of biomarkers has been added.*

(3) However, I strongly suggest to improve the quality and methodology of the manuscript by re-structuring it as a systematic review with the following sections: introduction, materials and methods, results, discussion, conclusions.

*The manuscript has been restructured as systematic review*

(3) The manuscript needs to be reviewed by an English language expert

*The review has been linguistically reviewed*

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Clinical Urology*.

Sincerely yours,

*Add signature*
