| 研究目的: 本研究通过联合训练的方法改善患者的下肢运动功能, 通过观察前交叉韧带重建术后患者的功能的改善情况, 求证悬吊训练联合等速训练在前交叉韧带重建术后患者康复中有效性和实用性, 为其临床应用和推广提供一定的科学依据。 | | | | | |
| Objectives of Study: The aim of this study is to improve the patient's lower limb motor function through combined training.After reviewing the improvement of knee joint function in patients with anterior cruciate ligament reconstruction,we can explore the effectiveness and practicability of sling training combined isokinetic strength training in the postoperative rehabilitation of patients with anterior cruciate ligament.This study will provide certain scientific basis for clinical application and promotion. | | | | | |
