

Answer to reviewers:

(1) The title would better be changed. (2) The symptoms & signs support MRI should be presented. (3) Coccyxalgia ("tail bone") is so different from LBP. It should be discussed. (4) The over investigation with MRI for all spinal problems (not only sacral region should be discussed, to make the manuscript more instructive.

Language quality: Language was revised in all sections

Scientific quality: (1) Title is changed, (2) the signs and symptoms of reviewed MRI are included, (3) coccyxalgia is specifically discussed, and (4) MRI overutilization in all spinal problems is now further discussed.
