

January 26, 2021

Dear Lian-Sheng Ma
Editor in Chief, World Journal of Gastroenterology

Thank you and the reviewers for the thorough review of our manuscript and insightful comments which have helped us to improve the quality of our manuscript, **“Efficacy and safety of endoscopic submucosal dissection for Gastric tube cancer: A multicenter, retrospective study”** (manuscript No:60258). We have carefully considered all comments and suggestions provided by reviewers and Editorial Office’s comment, and revised our manuscript accordingly.

- According to the Format for references guidelines, we changed some reference number in order to avoid more than five references in a single citation.
- We provided the original figure documents using PowerPoint .
- We added the “article highlight” section at the end of main manuscript.

We hope that the revised version is now acceptable for publication as an Original Article in *World Journal of Gastroenterology*. Please do not hesitate to let us know whether there are any further changes we should make to the manuscript.

With best regards.

Sincerely yours,

Seiji Kawano, M.D.PhD
