Introduction. **Severe acute pancreatitis** (SAP) is characterized by a complicated cascade of inflammatory responses and activation of digestive enzymes in pancreatic acinar cells. 1 Early management is considered indispensable for cure of patients who show symptoms of SAP. 2 Although our knowledge and critical care of patients with SAP have improved, the mortality rate ...

<https://link.springer.com/article/10.1007/s10620-020-06801-6> ▼

**Acute** lung injury (ALI) is the most common complication and one of the leading causes of mortality of **severe acute pancreatitis** (SAP). Nevertheless, no effective therapeutic schemes are presently available. To investigate the effect and potential mechanism of mesenteric lymph duct ligation (MLDL) on experimental SAP-induced ALI. Immediately following MLDL, **rats** were subjected to SAP by ...
