## Primary Spinal Intramedullary Malignant Melanoma: Case ...

<https://academic.oup.com/neurosurgery/article-abstract/25/1/117/2754966> ▾

Jul 01, 1989 · A rare case of **primary spinal intramedullary malignant melanoma** at the T6 level in a 31-year-old man is presented. The tumor was partially removed, and neuroaxis irradiation up to 50 Gy was then administered. Subsequently, systemic interferon beta (specific activity,  $2.0 \times 10^8$  IU/mg protein) therapy (total dose,  $2.2 \times 10^7$  units) was begun. At the completion of these therapies, ...
