Conclusions These guidelines standardise the management of patients with refractory gastro-oesophageal reflux disease and **Barrett's oesophagus in the Asia-Pacific region**. View Show abstract

Changing disease burden and management issues for ...

<https://onlinelibrary.wiley.com/doi/10.1046/j.1440-1746.2002.02728.x>

In Asia, where the incidence of **Barrett's esophagus** is low, these therapies are of limited importance. Conclusions. Epidemiology patterns between the East and West have been changing and have impacted on **management** issues for cancer of the **esophagus**. This also makes interpretation of data in the literature more difficult.
