

## Answering Reviewers

### 1. The manuscript should be edited. There are some minor language polishing.

Response: Our manuscript has been translated and polished before submission by *International Science Editing*. If necessary, we can also send the manuscript to the biomedical editing companies for further polishing, such as *Filipodia Publishing, LLC*. We have corrected some small errors in the manuscript, such as correcting some Chinese characters, correcting case and simplifying the content of the title.

### 2. Please number the table, and refer it in the main text.

Response: Thank you for your advice. We number the table as **table 1** and refer it in the main text in **line 171**.

### 3. A conclusion should be summary.

Response: Thank you for your advice. We have made the conclusion clear in line 189-203.
