SPECIFIC COMMENTS TO AUTHORS

1. The authors have read the CARE Checklist (2016), and the manuscript was prepared and revised according to the CARE Checklist (2016). However, there are some Omissions in the manuscript. For instance, A definite diagnosis of this patient is not given in the abstract. 2. There is no Timeline of "Information from this case report organized into a timeline (table or figure)" 3. The patient information description is too simple, and the content is incomplete, such as no description of past history, personal history, genetic history, other Relevant history including past interventions and outcomes. 4. It is just a simple list of the examination results, and the diagnostic basis and differential diagnosis content were not described in the article. 5. In the manuscript, the author listed some Chinese medicine with anticancer effect, such as *Scutellaria barbata* D. Don (Banzhilian), *Smilax glabra* Roxb. (Tufuling), *Panax notoginseng* (Burkill) F. H. Chen (Sanqi), *Scleromitrium diffusum* (Willd.) R. J. Wang (Baihuasheshecao), *Scutellaria barbata* D. Don (Banzhilian). However, As we all know, for the treatment of Glioblastoma, the drug must first pass through the blood-brain barrier. And can the main components in KLP pass through the blood-brain barrier? Please describe in detail. 6. Finally, English writing needs to be improved. 7. Some references are not written properly.
