**Manuscript Type:** ORIGINAL ARTICLE

*Observational Study*

**Cone beam computed tomographic evaluation of pharyngeal airway in North Indian children with different skeletal patterns**

Airway in different skeletal patterns

**Abstract**

**BACKGROUND**

In growing patients with skeletal discrepancies, early assessment of functional factors can be vital for the restoration of normal craniofacial growth.

**AIM**

Comparing airway volumes in patients with mandibular retrognathism with the normal

Obstructive sleep apnea (OSA) is a sleep disorder characterized by pauses in breathing or shallow breathing during sleep and has an incidence of 2%–4% in adults. 1 The pathogenesis of OSA includes narrowing and obstruction of the upper airway, in particular the pharyngeal airway. Previous studies have demonstrated that obstruction of the pharyngeal airway is associated with mandibular ...
