#### **SPECIFIC COMMENTS TO AUTHORS**

AUR during pregnancy is a rare condition. The diagnosis may be delayed. In this case series study, the authors provided a good and clear algorithm to manage this situation based on an exhaustive review of the literature. I think that is very valuable in urogynecological practice. You should revise reference number 2 that is not matching the topic. Good Work.

## RE-REVIEW REPORT OF REVISED MANUSCRIPT

The authors provide an interesting case serie describing acute urinary retention during pregnancy and providing an exhaustive literature review. The piece is structured appropriately and draws together a good range of literature. The introduction appropriate lays the foundations for the case serie presentation. The key learning point of this publication is the prompt diagnosis and recognition of an acute urinary retention secondary to a retroverted uterus. So, i think that it's worth sharing with colleagues. Good job.
