

December 20, 2020

Dear editors:

**Title of study: Low BMI (<18.5 kg/m<sup>2</sup>) is an independent predictor of poor long-term prognosis among patients with resectable gastric cancer: a retrospective study at Chinese National Cancer Center**

This letter is to confirm that I have read the ethics application prepared for this study. The statistical methods and techniques mentioned are appropriate for the research.

Please contact me if you have any queries.

Sincerely,

Shangying Hu, PhD.,  
Department of Cancer Epidemiology,  
National Cancer Center/Cancer Hospital, Chinese Academy of Medical Sciences &  
Peking Union Medical College, 17 South Panjiayuan, Beijing, 100021, China.
