

COVID-19 and its effects upon Orthopaedic Surgery: The Trinidad and Tobago

Experience

2 Abstract

The World Health Organisation (WHO) declared COVID-19 a pandemic on March 11, 2020. COVID-19 is not the first infectious disease to affect Trinidad and Tobago (T & T). The country has faced outbreaks of both Chikungunya and Zika virus in 2014 and 2016 respectively. The viral pandemic is predicted to have a significant impact upon all countries, but the healthcare services in a developing country are especially vulnerable.
