#### **SPECIFIC COMMENTS TO AUTHORS**

Thank you for the invitation to review this manuscript. - Please shorten the Abstract's sentences. - The case presentation would be better as a single standard paragraph. - Please reformulate this sentence in the last paragraph: "NF should be considered in a rapidly growing nodule with a relatively clear border in the upper limb, despite an atypical site and large tumor volume, because a relatively conservative diagnosis, especially during the surgery, could reduce overtreatment". - Please describe if there is any clinical or radiologic follow-up performed or planned for this patient.
