

Dear Editor:

I really appreciate your inputs on my paper. I have modify the paper according to your suggestions.

- (1) PMID and DOI numbers are missing in the reference list. Please provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references. Please revise throughout;

Reply: I have added all the authors names , PMID and DOI numbers in the reference list. Except Reference 10, 11 and 44 as they are books, and Reference 50, 53 and 75 as they are FDA related citation. But during the submission in the system, I do not know why the reference auto-analyzer shows that there are some doi/PMIID missing, I have to accept its suggestions in the system.

- (2) Authors should always cite references that are relevant to their study. Please check and remove any references that not relevant to this study.

Reply: I have checked the references, I think they are all relevant to this study, even though the references are a little too many, but I prefer to keep them all.

I also have put tables in separate word document as request in the submission system

Thank you and best regards

Ke Ma
