SPECIFIC COMMENTS TO AUTHORS

This expert consensus on the ion channel drugs for neuropathic pain is very interesting. In this consensus, the mechanism and characteristics of sodium and calcium channel drugs were reviewed. The authors developed the recommendations for the therapeutic principles and clinical practice for Carbamazepine, Oxcarbazepine, Lidocaine, Bulleyaconitine A, Pregabalin and Gabapentin. The manuscript is very well written, and the reviewer thinks it will provide direction for clinicians and patients when they use ion channel drugs for the management of neuropathic pain. Minor suggestions: (1) The manuscript requires a minor editing. Some minor language polishing should be revised. (2) Tables should be referred in the main text.
