

Reviewer 05106229: This study is an expert consensus on non-opioid analgesics for chronic musculoskeletal pain. This study is very well written. In this study, Huang et al developed the clinical practice consensus for the treatment of chronic musculoskeletal pain with non-opioid analgesics. This consensus focus on the pathogenesis, nonsteroidal anti-inflammatory drugs, serotonin-noradrenaline reuptake inhibitor, muscle relaxant, ion channel drugs, topical drugs. The reviewer thinks that this consensus will give a good guideline for the clinicians on the chronic musculoskeletal pain. The reviewer suggests to accept this manuscript after a minor editing. Thank you very much.

Response:

Dear commentator:

Thank you very much for your detailed review of my article. I have made changes to the format of my article. I wish you success in your work and a happy life!
