Introduction

Non-Colonoscopy Interventions

Prevention of Recurrent Lower .

Acute overt lower gastrointestinal bleeding (LGIB) accounts for ~20% of all cases of gastrointestinal (GI) bleeding, usually leads to hospital admission with invasive diagnostic evaluations, and consumes significant medical resources (1, 2, 3). Although most patients with acute LGIB stop bleeding spontaneously and have favorable outcomes, morbidity and mortality are increased in older patients and those with comorbid medical conditions (4). An individual with acute LGIB classically presents with the ...

[https://www.medicinenet.com/blood\\_in\\_the\\_stool\\_rectal\\_bleeding/article.htm](https://www.medicinenet.com/blood_in_the_stool_rectal_bleeding/article.htm) ▾

Jul 12, 2019 · **Rectal bleeding** is the passage of blood through the anus. The **bleeding** may result in bright **red** blood in the stool as well as maroon colored or black stool. The **bleeding** also may be occult (not visible with the human eye). The common causes of **rectal bleeding** from the colon include anal fissure, hemorrhoids, diverticulosis, colon cancer and polyps, colonic polyp removal, angiodysplasias ...
