Clinical Outcomes of Nonoperative Treatment for Rotator ...
<https://journals.sagepub.com/doi/10.1177/2325967120967911?cid=int.sj-full-text...>
Background: Patients who sustain a rotator cuff re-tear after arthroscopic rotator cuff repair are generally considered to have worse clinical outcomes compared with patients with an intact rotator c...

Functional outcomes after non-operative treatment of ...
<https://www.sciencedirect.com/science/article/pii/S1877056818302184>
Dec 01, 2018 · Background. Massive rotator cuff tears (RCTs) account for 10% to 40% of all RCTs and over 80% of re-tears. The objectives of this prospective study were to assess functional outcomes 6 and 12 months after starting non-operative therapy for an irreparable massive RCT and to identify predictors of good outcomes of non-operative treatment.
