## **SPECIFIC COMMENTS TO AUTHORS**

World Journal of Clinical Cases - Manuscript review of Manuscript NO: 61317  
Eltrombopag-related renal vein thromboembolism in a patient with immune thrombocytopenia: A case report Dear Author, First of all, thank you for submitting your manuscript to the World Journal of Clinical Cases. This is an interesting article providing valuable insights for the management of IPT with eltrombopag highlighting an unusual complication of this treatment. However, it could be improved with some corrections and supplement. It should also be modified according to the journal requirements. 1 Abstract, page 1, line 9 - please follow the journal requirements for the structure of abstract (background, case presentation, conclusions). 2 Line 26 - TPO-RA - please provide the full explanation of abbreviation when first mentioning in the manuscript. 3 Line 34 - the second "for" seems to be unnecessary. 4 Line 42 -please rewrite case presentation part according to the required structure of the journal. 5 Line 46 - please clarify the treatment duration and dosage of prednisolone. 6 Line 49 - please clarify the dosage of danazol and treatment duration. 7 Line 52 - when did the abdominal pain start in relation with eltrombopag (was it a week after prescription?) 8 Do you have any results from previous abdominal ultrasound? Were there any changes? 9 Line 65 - to my opinion, it would be clearer and easier to follow, if you provided laboratory results with normal ranges in a table. 10 Line 90 - please provide the dosage of eltrombopag - was it the same as previous? 11 Line 91 - what do you mean by "adequate regimen of rivaroxaban" - please provide dosage 12 Line 95 (figure 1)- Please provide the description of the figures following journal guidelines and include explanations for the used arrows. 13 Line 98 (figure 2), line 100 (figure 3) - Please provide the description of the figures following journal guidelines 14 Line 143 - it would be clearer. if you point out the exact number in days after exposure "short period of

World Journal of Clinical Cases - re-review of Manuscript NO: 61317    Eltrombopag-related renal vein thromboembolism in a patient with immune thrombocytopenia: A case report    Dear authors, Thank you for revising your manuscript (Manuscript NO.: 61217) regarding the provided suggestions and raised questions. The manuscript was revised according to comments in the Peer-Review Report. The authors have provided a point-by-point response to raised issues and made the corrections. However, there are still some small improvements to make. - Please provide the ORCID numbers of all authors; - Please correct the style and position of the references throughout the manuscript according to the guidelines (superscripted square brackets); - Please remove comments from the manuscript; Chief complains and History of present illness: I suggest to modify these paragraphs (see the suggestion below). You can also specify the more exact localisation of the abdominal pain, mention if there was nausea, vomiting. Chief complaints    A 48-year-old woman presented to our hospital due to abdominal pain, distension and a 5-day bout of constipation. History of present illness Abdominal pain and distention started a week ago and progressed. There were no other symptoms (ie, breathlessness, chest pain, hemoptysis, or syncope).
