#### **SPECIFIC COMMENTS TO AUTHORS**

This is an interesting case report. The authors' observation is informative enough for readers of the journal. I have some minor concerns. 1. I understand that the patient had secondary protein S and C deficiency due to SLE. Thus, what kind of autoantibodies are responsible for this issue? Please clarify and if possible, sequential changes of the titer of such autoantibodies after immunosuppressive treatment. 2. Extensive literature search regarding similar cases should be needed. Then, in-more-depth discussion should be needed.

## RE-REVIEW REPORT OF REVISED MANUSCRIPT
