Study: Kids, adults equally susceptible to in-home COVID ...

<https://www.cidrap.umn.edu/news-perspective/2020/...>

The **children of index COVID-19 patients** were more likely to become infected than those whose infected household member was not their **parent** (odds ratio [OR], 17.28). The odds of becoming infected did not differ substantially by age, sex, race, underlying illnesses, size of the household, number of household members, or ratio of **children** to bedrooms and bathrooms.

Clinical and Epidemiologic Analysis of COVID-19 Children ...

<https://journals.lww.com/pidj/Fulltext/2021/01000/...>

In Bogotá, capital and most populated city in Colombia, 1874 **cases of children** under 18 years **infected** with **COVID-19** were registered, 73.5% mild and 23.4% asymptomatic **cases**, and only 8 severe (0.4%). The majority, 1082 (57.7%) are at home and 736 (39.2%) are recovered, with no death record.
