Renal artery embolization in the treatment of urinary fistula after renal duplication:

A case report and review of literature

Tao Y *et al.* Renal artery embolization treating urinary fistula

Yang Tao, Jun Wen, Tan-Tan Xu, Wen-Jing Cui, Jian Xu

Abstract

BACKGROUND

Duplicate renal malformation is a congenital disease of the urinary system, with an incidence rate of 0.8%. Surgical treatment is suitable for symptomatic patients. Urinary fistula is one of the complications of heminephrectomy. The long-term urinary fistula have a great impact on patients' lives.
