

HAEMOPTYSIS - A RARE PRESENTATION OF AORTIC ANE ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2853042>

Haemoptysis in aortic aneurysm is very rare, caused by erosion of trachea by the aneurysm or rupture of aneurysm into the lung. A patient who presented with haemoptysis had a large mediastinal mass on X - Ray chest. CT Scan demonstrated a large aneurysm of ascending aorta and arch of aorta. The patient is VDRL Reactive.

THORACOABDOMINAL aortic aneurysm (TAAA) repair presents a challenging and complex task for both the surgeon and anesthesiologist. Historically, morbidity and mortality for TAAA repair has been high, and is both surgeon- and institution-dependent. However, the TAAA complication rate has improved significantly in the past decade via research, improved surgical technique, and perioperative ...
