#### **SPECIFIC COMMENTS TO AUTHORS**

This manuscript is well written review showing recent advancement of GMA therapy in contrast with other IBD treatments. And this paper has successfully documented a certain new established academic process in Europe and in Japan. I think this paper is published as it is.

#### **SPECIFIC COMMENTS TO AUTHORS**

The authors have reviewed some data on the use of GMA from Europe. The presentation needs to be more structured. There is no explanation on how they gathered the data. It would be much informative to have a pros and cons segments in the article . The issue of cost was not covered. The reason for unpopularity in Europe and west as compared to Japan needs to be discussed. The title might be better to be changed to European experience rather than opinion .

At the initial review I had sent a good message and I do not change the evaluation as before.
