#### **SPECIFIC COMMENTS TO AUTHORS**

It is an interesting case report. I think it would be useful to explain the following issues.  
Is splenectomy performed laparoscopically. was the liver checked during the surgery?  
After the diagnosis of metastasis, was a liver biopsy performed? In manuscript text:  
Similar results were repeated in the treatment and outcome section. The bcl 1 test is  
important in the distinction between Kaposi and angiosarcomas. should be highlighted  
in the text
