Acute recurrent pancreatitis: Etiopathogenesis, diagnosis ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC25493002>

Dec 07, 2014 · Acute recurrent pancreatitis (ARP) refers to a clinical entity characterized by episodes of acute pancreatitis which occurs on more than one occasion. Recurrence of pancreatitis generally occurs in a setting of normal morpho-functional gland, however, an established chronic disease may be found either on the occasion of the first episode of ...

Idiopathic recurrent acute pancreatitis - The Lancet ...

[https://www.thelancet.com/journals/langas/article/PIIS2468-1253\(18\)30211-5/fulltext](https://www.thelancet.com/journals/langas/article/PIIS2468-1253(18)30211-5/fulltext)

Idiopathic recurrent acute pancreatitis is clinically challenging and has substantial socioeconomic consequences. Investigations are expensive and often reveal little about the cause of the disease. Little is known about the interaction between genetic, environmental, anatomical, and other factors that contribute to the disease. Data on the efficacy, safety, and long-term outcomes of ...

Recurrent acute pancreatitis: an approach to diagnosis and ...

www.tropicalgastro.com/articles/34/3/recurrent-acute-pancreatitis.html

Recurrent acute pancreatitis (RAP) is defined as more than two attacks of acute pancreatitis (AP) without any evidence of underlying chronic pancreatitis (CP). As the known causes of AP are generally taken care of, RAP usually occurs in the idiopathic group, which forms 20%–25% of cases of AP. The causes of idiopathic RAP (IRAP) can be mechanical, toxic-metabolic, anatomical, or ...

Clinical Pancreatic Cancer

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2023887>

Two patients died in the early postoperative course from acute pancreatitis and pancreatic leak. 12 (resp. 24, 30) months survival rate in the palliative resection group compared to the bypass procedures was 30%: 21 %, 30%: 10% and 15%: 8% respectively ($p < 0.05$). There were no significant differences in survival rate between the two groups using ...

Pancreatic Head Resection With Segmental Duodenectomy

<https://www.researchgate.net/publication/5804997...>

Neoplasms of the exocrine pancreas | Oncohematoma Key

<https://oncohemakey.com/neoplasms-of-the-exocrine-pancreas> ▾

Pathology Histopathology of exocrine pancreatic neoplasms. PDAC accounts for approximately 95% of all neoplasms arising in the pancreas. 133 On histological examination of surgically resected tumors, it is not uncommon to find neoplastic cells infiltrating into lymphatic structures or into the many nerve endings innervating the pancreatic bed, which may explain the pain associated with PDAC.

Pearls and pitfalls of imaging metastatic disease from ...

<https://www.sciencedirect.com/science/article/pii/S0899707115001096>

Sep 01, 2015 · Despite long duration and severe obstruction, acute pancreatitis is an uncommon first presentation of pancreatic carcinoma. Pancreatic carcinoma may, however, present initially as acute pancreatitis in up to 17% of patients without gallstone, alcohol abuse, or Endoscopic retrograde cholangiopancreatography (ERCP) as an etiology [14] .
