

Reviewer #1:

**Scientific Quality:** Grade C (Good)

**Language Quality:** Grade A (Priority publishing)

**Conclusion:** Minor revision

**Specific Comments to Authors:** MPNST is a rare disease, but there are several reports in other journals. And the 'Synthes® MatrixRib Precontoured Plate system' used for chest wall reconstruction can cause problems such as being broken by strong force. Recently, the use of artificial ribs using 3D print is being used as a new technology, so this paper is not considered a fresh report.

**Science editor:** 1 Scientific quality: The manuscript describes a case report of the reconstruction of the chest wall after resection of malignant peripheral nerve sheath tumor. The topic is within the scope of the WJCC. (1) Classification: Grade C; (2) Summary of the Peer-Review Report: MPNST is a rare disease. However, there are several reports in other journals. The 'Synthes® MatrixRib Precontoured Plate system' used for chest wall reconstruction can cause problems such as being broken by strong force; and (3) Format: There are 4 figures. (4) References: A total of 15 references are cited, including 13 references published in the last 3 years; (5) Self-cited references: There is 1 self-cited reference. The self-referencing rates should be less than 10%. Please keep the reasonable self-citations that are closely related to the topic of the manuscript, and remove other improper self-citations. If the authors fail to address the critical issue of self-citation, the editing process of this manuscript will be terminated; and (6) References recommend: The authors have the right to refuse to cite improper references recommended by peer reviewer(s), especially the references published by the peer reviewer(s) themselves. If the authors found the peer reviewer(s) request the authors to cite improper references published by themselves, please send the peer reviewer's ID number to the [editorialoffice@wjgnet.com](mailto:editorialoffice@wjgnet.com). The Editorial Office will close and remove the peer reviewer from the F6Publishing system immediately. 2 Language evaluation: Classification: Grade A. A language editing certificate issued by SNAS was provided. 3 Academic norms and rules: The authors provided the CARE Checklist-2016 and Written informed consent. No academic misconduct was found in the Bing search. 4 Supplementary comments: This is an unsolicited manuscript. No financial support was obtained for the study. The topic has not previously been published in the WJCC. 5 Issues raised: (1) The title is too long, and it should be no more than 18 words; and (2) The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor. 6 Recommendation: Conditional acceptance.

1. After the operation, we will advise the patients to avoid strenuous activities and weight-bearing. At present, we haven't encountered plate fracture. Metal fatigue or strong force may lead to plate fracture. At present, we have no experience in 3D printing reconstruction.
2. After checking the references, no self-citation reference was found.
3. After checking the title of the article, there are 16 words now.
4. We have uploaded the original figure documents using PowerPoint.
