Comparison of Recommendations for Treatment of Chronic ...

<https://pubmed.ncbi.nlm.nih.gov/32205770>

There is strong consensus on treating all adolescents with chronic HCV infection with DAA and on delaying therapy in younger children until these agents are approved for them. Interferon-based therapies should be avoided. Specific recommendations regarding which DAA regimen to use and treatment dura...

Cascade of care for children and adolescents with chronic hepatitis C

Rogers ME *et al.* Chronic hepatitis C in children

Michael Evan Rogers, William F Balistreri

Abstract

Chronic hepatitis C virus (HCV) infection presents a significant global public health burden. In 2015, over 400000 deaths worldwide were attributed to HCV infection. This led the World Health Organization (WHO) in 2016 to set the ambitious goal of eliminating HCV by 2030. Adult-centered guidelines have been established in order to provide direction for healthcare professionals, allowing integration of the newest screening policies and therapeutic strategies into their practices. However, for children

Chronic Hepatitis C Infection in Children: Current ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4542086>

Transmission rates from non-human immunodeficiency virus (HIV) mothers are reported in around 5% of cases and account for nearly half of all infected children within the UK.¹ In contrast, parenteral transmission remains the most common method of infection in the developing world.^{1,2} The overall rate of spontaneous viral clearance following childhood infection is low, with the majority of children developing chronic hepatitis C (CHC) (54–86%).² The clinical course of CHC in children ...

HCV in Children | HCV Guidance

<https://www.hcvguidelines.org/unique-populations/children> ▾

To remain well, untreated children with chronic hepatitis C are encouraged to maintain a healthy body weight due to the known deleterious effects of insulin resistance on fibrosis progression with HCV infection (Kukla, 2015); (Petta, 2011); ; (Moucari, 2008). Commonly used medications, such as antimicrobial agents, antiepileptics, and cardiovascular agents, should be dosed per standard ...
