#### **SPECIFIC COMMENTS TO AUTHORS**

The authors summarize a collection of 67 cases from literature for inflammatory pseudotumor-like follicular dendritic cell sarcoma and submitted as evidence review. Comments: 1. The diagnosis is almost always confirmed by pathology. Can authors summarize preoperative or pre-biopsy image features that are characteristic for this rare disease entity? 2. The table head of Table 3 "Univariate analyses of factors associations with progression free" is not clear and needs rewriting for grammar check. 3. Table 3 and 4 can be combined into one table 4. What is the possible explanations for the high recurrence rate (44.9% in 5 years)? Is there any potential adjuvant therapy after surgery? Does liquid biopsy help to choose cancer medications? Could immunotherapy play a role in treatment? 5. The title misled readers that it is a case collection from the authors' own experiences.
