Qing Chang Hua Shi granule ameliorate inflammation in ...

<https://www.semanticscholar.org/paper/Qing-Chang-Hua-Shi-granule-ameliorate...>

Ulcerative colitis (UC), a bowel disease with significant morbidity, is associated with inflammation. In this **study**, the effect of **Qingchang Huashi** granule (QCHS) on UC and its underlying **mechanisms** were explored using both animal and cell culture experiments. A rat UC model was induced with trinitro-benzene-sulfonic acid (TNBS), concentrations of the cytokines IL-1 α , IL-6, IL-8, IL-1 β , and ...
