**Tests to Diagnose the Cause of Knee Pain - Verywell Health**

<https://www.verywellhealth.com/examination-of-the-knee-2549602> - Joint line tenderness: Joint line tenderness is a very non-specific test for a meniscus tear. The area of the meniscus is felt, and a positive test is considered when there is pain in this area. McMurray's test: McMurray's test is performed with the patient lying flat on his back and the examiner bending the knee. A click can be felt over the meniscus tear as the knee is brought from full ...

## The challenges of treating Jehovah's witnesses

[https://www.medicalprotection.org/southafrica/...](https://www.medicalprotection.org/southafrica/)

The Jehovah's Witness religion is a Christian denomination with millions of members in more than 200 countries worldwide. Jehovah's Witnesses are well-known for their refusal to receive blood transfusions, which may lead to various challenges for medical practitioners involved in the treatment and management of Jehovah's Witness patients.
