<https://citoday.com/articles/2020-july-aug/patient-selection-and-periprocedural...> ▾

Severe tricuspid regurgitation (TR) affects approximately 4% of the population > 75 years, and the overall incidence is expected to increase with an aging population. 1 For a long time, severe TR was considered a mere surrogate for more advanced cardiovascular disease. However, recent research changed this paradigm by demonstrating the prognostic importance of severe TR. 2 Due to the high perioperative mortality risk, surgical tricuspid valve ...

Transcatheter Pulmonary Valve Implantation - Medical ...

www.aetna.com/cpb/medical/data/800\_899/0821.html

An UpToDate review on "Percutaneous **pulmonic** valve implantation" (Fratz, 2015) states that "PPVI [percutaneous **pulmonary** valve implantation] can also be performed as a repeat intervention after failure of the primary device in the RVOT. The indications and the **implantation** technique are the same for repeat PPVI as for primary PPVI.
