Dear Dr. Chatterjee,

Hope that all is well with you. Please see attached three Alterra images that you can select from.

Please let me know if you need anything else.

Kind regards,

Angila Sewal, PhD

Subject: [EXTERNAL] Request for an image of "Alterra" pre- for TPVI review

Hello

I am writing an invited review on transcatheter pulmonic valve implantation for the *World Journal of Cardiology* and would like to request an image for the *Alterra pre-stent* - *hopefully a high resolution picture which we can use for our manuscript.*

Our manuscript draft is attached for your reference.

Thanks and best regards
Arka.

Hi Peggy,

Please see the attached image request form along with images of Melody, Ensemble, and Harmony.

Dr. Mark Law is looking for authorization to use.

Let me know, thanks!

Hi Justin,

I have attached the form.

The images we are looking to place into a review of TPVI are the melody valve, ensemble system, and harmony valve. We just want to appropriately use images with your permission.

Thanks,
Mark

Hello Dr. Law,

Attached is the image request form that Juan referenced. Not sure if you have some images in mind that you'd like to use or if you'd like us to send you images of the Melody TPV and Ensemble II delivery system.

Please populate and send back to me, and we'll get you the images and/or authorization shortly.

Thanks!

Dr. Law,

I have spoken to our Marketing department. As soon had said earlier, Medtronic's policy is very open regarding usage of images and such. They want to make sure you have the best images for your paper. I am copying Justin Sutkowski, our Sr. Market Development Manager, on this email. There is a form that needs to be filled and he will send it to you. The turnaround time is not long.

Thank you again. Please let me know if there is anything else I can do,

Juan

Do not leave a child or 2 children alone in a car.

Figure 4.6: A plot of the function $f(x) = \sin(x)$ for $x \in [0, 2\pi]$. The x-axis is labeled x and ranges from 0 to 2π . The y-axis is labeled $f(x)$ and ranges from -1 to 1. The curve starts at (0,0), reaches a maximum at $(\pi/2, 1)$, crosses the x-axis at $(\pi, 0)$, reaches a minimum at $(3\pi/2, -1)$, and ends at $(2\pi, 0)$.

do not happen on 1 often and change to a fairly low rate as it gets on the top of the water bottle every 1000 ft. I have not seen any more of the water bottle.

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to understand the target audience's preferences and pain points. Once a need is identified, the next step is to develop a concept that addresses this need. This often involves brainstorming sessions and the creation of a prototype. The third step is to conduct a feasibility study to assess the technical and financial viability of the concept. This is followed by the development of a business plan, which outlines the marketing strategy, production process, and financial projections. Finally, the product is launched into the market, and the company monitors its performance and gathers feedback for future improvements.
