Fatigue in Inflammatory Bowel Diseases: Etiologies and ...

<https://pubmed.ncbi.nlm.nih.gov/31760611>

Fatigue is a burdensome, multidimensional, and multifactorial symptom that is associated with a wide array of chronic illnesses, specifically occurring in nearly 50% of **patients with** inflammatory bowel **disease (IBD)**. Although common, given its subjective nature, physicians often under-recognize and undertreat this debilitating symptom.
