Dear editor,

Please find attached files of revised manuscript in word format

**Title: Design and Development of a New Type of Phimosi Dilatation Retractor for Children**

**Author:** Youwei Yue, Yiwen Cheng<sup>2</sup>, Li-ping Deng, Han-liang Zhu, Jianhua Feng

**Name of Journal:** World Journal of Clinical Cases

**Manuscript NO:** 62090

First of all, thank you for your careful guidance of this article. Revision has been made according to the suggestions of the reviewer:

**Reviewer:** 03115435

Phimosi is one of the most common illnesses among children. Intervening children phimosi through various methods benefits the development of their reproductive organs. The treatments for intervening children's phimosi are all twofold, and timely selection of the right therapy method can significantly improve the prognosis effect of children phimosi. Surgeries like circumcision and cerclage surgeries for children phimosi can greatly affect children's normal life in the post-surgery period. General anesthesia is required for children of young ages, but this kind of anesthesia involves great risks. Besides, healing of operative incisions takes a long time. So that the parents resort to treatments are more suitable for treating children phimosi. In this study, the authors designed a new type of phimosi dilatation retractor for children. The study is well designed, the methods are described in detail. The results are very

interesting. Minor comments: 1. The manuscript requires an minor editing. Some misspellings should be corrected. 2. Please check the “1.2 Product Structure”. It seems the descriptions of the figures are missing. The sentence is not related in the study. Please check and revise it. 3. A conclusion is required.

Thank you for your advice.

After receiving the comments, we read this article carefully and found some small loopholes in the language of the article and made modifications. We described Figure 1 in detail and added new conclusions. According to the suggestion, we changed the relavant description.

Thank you again for publishing our manuscript in the World Journal of Clinical Cases.

Sincerely Yours,  
Jianhua Feng
