SPECIFIC COMMENTS TO AUTHORS

Dear Associate Editor Thank you for sending me the manuscript entitled “Acquired hepatocerebral degeneration associated with advanced liver disease due to multi-modality treatments in a metastatic neuroendocrine tumor long-term survivor: An update on neuroendocrine neoplasm’s treatment based on a case report” for review. This case report describes a case of Acquired hepatocerebral degeneration in a metastatic small intestine NET long-term survivor. There are some comments as the followings: 1-Please revise the title, which seems too long. 2-Please revise the running title. The suggested title could be “AHD WITH BRAIN MANGANESE DEPOSITS IN A METASTATIC NET”. 3-Please define the keywords based on MeSH terms. 4-The background is too long. Please focus on the attractions and the novelty of case. Details on the characteristics’ of the NET and their specific treatment modalities adverse effects would be addressed in discussion section. 5-Please refer to the pre-operations data regarding patients liver function tests and explain if the patient has any signs for Wilson disease. 6- Please define the abbreviations (SSA and PRRT) in introduction part. 7-Please define if any opioids were prescribed for pain relief. 8-Please explain the main findings and novelty of the case in the first paragraph of discussion.
