SPECIFIC COMMENTS TO AUTHORS

This article described a rare but potentially life-threatening adverse event Stevens Johnson Syndrome and concurrent Hand Foot Syndrome during capecitabine treatment. It suggests that medical oncologists need to pay attention to the fatal effect when prescribe capecitabine. And the effective treatment of this case through steroids further provided evidence of its usefulness in SJS management.

SPECIFIC COMMENTS TO AUTHORS

In this paper, The authors present a case report describing Stevens Johnson Syndrome And Concurrent Hand Foot Syndrome During Treatment With Capecitabine. Though it is interesting, there are still some important points. major comments 1.In general, Stevens Johnson Syndrome And Concurrent Hand Foot Syndrome During Treatment With Capecitabine are not common, but not rare. As their references, there are many similar situations have been reported before. This case dose not put more information in this field. 2.The author mentioned the patient developed Stevens Johnson Syndrome And Concurrent Hand Foot Syndrome six weeks after Capecitabine chemotherapy. Her symptoms were already very serious at the time of treatment. The authors need to explain the evolution of the symptoms in the past six weeks. 3.The author mentioned the patient's symptoms improved significantly after treatment, however, they mentioned "she unfortunately died 2 months later because of multisystem organ failure". What is the specific cause of death? Is it related to Stevens Johnson Syndrome And Concurrent Hand Foot Syndrome? 4.There are some mistakes in the manuscript. The author needs to review the full text carefully and revise them. for example: a. In the cover letter, " I am pleased to submit an original research article entitled Case report" for consideration for publication in Journal of Breast cancer."It needs to be corrected to " I am pleased to submit a case report entitled Case report" for consideration for publication in World Journal of Clinical Cases."b. Iin the first paragraph of discuss, "Nevertheless, our experience and other reports suggest that capecitabine may also be associated with the development of potentially life-threatening dermatological conditions, such as SJS. Sendur et al.[2] and Jadhav et al.[7] " The orders of references are wrong.
