[Factors influencing health care professionals' decision ...](#)

<https://open.library.ubc.ca/handle/2429/7922> ▾

The purpose of this study was to identify factors influencing health care professionals' decision-making regarding parental presence during invasive procedures on a child in the PICU. Guided by the qualitative method of interpretive description, data was collected from fifteen PICU nurses and physicians interviewed regarding their decision-making.

[Anaesthesia | British Journal of Medical Practitioners](#)

<https://www.bjmp.org/category/subject/anaesthesia?page=2> ▾

The NHS benefits from their skills and experience. Their experience helps the department to allocate them to provide out of hours work (on-call) sooner than a UK trainee after an appropriate period of induction. The journey of patient experience also improves with the presence of experienced staff ...
