

I, María Velayos López, lead author of the article “**Health staff as promoters of parental presence at anesthetic induction: Net Promoter Score survey**”

, report the refusal of informed consent for this report. The reasons are that no patients participated, but that the study was carried out with healthcare personnel who gave their consent by answering the survey.

On behalf of my colleagues and myself, I reject the need for informed consent with knowledge of the eventual risks involved, which I accept.

A handwritten signature in black ink, appearing to be 'M. Velayos', with a long horizontal stroke extending to the right.
