#### **SPECIFIC COMMENTS TO AUTHORS**

Tumors of the liver may be either malignant or benign. The liver is the third-most-common site for intra-abdominal malignancy in children, following adrenal neuroblastoma and Wilms tumor. Angiosarcoma and epithelioid hemangioendothelioma, are extremely rare entities in the pediatric population. This article highlight the clinicopathologic characteristics of hepatic angiosarcoma and epithelioid hemangioendothelioma. The writing format of this article is rigorous, the logic is rigorous, the references are detailed, and it is a very meaningful article.
