SPECIFIC COMMENTS TO AUTHORS

1. Why you choose to use the term "disease" and not "syndrome" knowing that many references, actually, prefer using syndrome for specific reasons,,,? 2. Kindly give details (dosage, duration, etc.) concerning the Isotretinoin and tetracyclines you gave to the patient after surgery 3. Since it is a very rare condition, try to add in the discussion more details about the history of the disease, the origin of the name.... 4. In the conclusion: remove " in summary" from the beginning of the paragraph
