#### **SPECIFIC COMMENTS TO AUTHORS**

This paper provides a clear diagnosis of cutaneous tuberculosis, which is a very rare disease. In this paper, the rarity of cutaneous tuberculosis, the necessity of long-term treatment and the accompanying liver and kidney damage were discussed in detail, and an effective external treatment scheme was provided. The last two paragraphs of the discussion can be combined into one paragraph. This paper only elaborates the possible effects of external treatment, and its mechanism has not been further studied. Please briefly explain many possible mechanisms. The whole discussion should be condensed highlight the main points. minor problem: 1. The format of references is not complete unified. 2. There are three aspects related to the age of patients in the whole paper, such as "a 32-year-old man" in "case summary", "a middle-aged man" in "core tip" and "a 23-year-old unmarried man" in "chief complaints". Please check the correct age. 3. Please provide a detailed and complete informed consent. Some of the pictures involve personal privacy.
