SPECIFIC COMMENTS TO AUTHORS

The authors have described an interesting case of management of acute severe UC. I have the following comments in no particular order: 1. It is good to see the high-quality introduction and discussion. Authors have done well to obtain to good clinical follow-up. 2. In the figures 1, 2, 3, authors need to mark A B C D on the figures themselves based on the journal's style. Eg. fuse the 4 images of endoscopy of figure 2 into one image panel with proper borders in one jpeg file. 3. Please say patient presented in poor condition (not 'bad'). 4. Please provide the blood pressure on admission. 5. The chief complaints, HOPI and past medical history history seem to be all muddled up. In the chief complaints, authors have reported past history. Please write correctly. 6. Highlight the key lab findings in the text as well of admission data (not just report everything in table).

SPECIFIC COMMENTS TO AUTHORS

Criteria Checklist for New Manuscript Peer-Review

- 1 Title. Does the title reflect the main subject/hypothesis of the manuscript? Yes.
- 2 Abstract. Does the abstract summarize and reflect the work described in the manuscript? Yes.
- 3 Key words. Do the key words reflect the focus of the manuscript? Yes.
- 4 Background. Does the manuscript adequately describe the background, present status and significance of the study? Highlight the particularity and rarity of this case.
- 5 Methods. Does the manuscript describe methods (e.g., experiments, data analysis, surveys, and clinical trials, etc.) in adequate detail? Yes.
- 6 Results. Are the research objectives achieved by the experiments used in this study? What are the contributions that the study has made for research progress in this field? Yes.
- 7 Discussion. Does the manuscript interpret the findings adequately and appropriately, highlighting the key points concisely, clearly and logically? Are the findings and their applicability/relevance to the literature stated in a clear and definite manner? Is the discussion accurate and does it discuss the paper's scientific significance and/or relevance to clinical practice sufficiently? Yes.
- 8 Illustrations and tables. Are the figures, diagrams and tables sufficient, good quality and appropriately illustrative of the paper contents? Do figures require labeling with arrows, asterisks etc., better legends? Yes.
- 9 Biostatistics. Does the manuscript meet the requirements of biostatistics? No.
- 10 Units. Does the manuscript meet the requirements of use of SI units? Yes.
- 11 References. Does the manuscript cite appropriately the latest, important and authoritative references in the introduction and discussion sections? Does the author self-cite, omit, incorrectly cite and/or over-cite references? Yes.
- 12 Quality of manuscript organization and presentation. Is the manuscript well, concisely and coherently organized and presented? Is the style, language and grammar accurate and appropriate? Yes.
- 13 Research methods and reporting. Authors should have prepared

their manuscripts according to manuscript type and the appropriate categories, as follows: (1) CARE Checklist (2013) - Case report; (2) CONSORT 2010 Statement - Clinical Trials study, Prospective study, Randomized Controlled trial, Randomized Clinical trial; (3) PRISMA 2009 Checklist - Evidence-Based Medicine, Systematic review, Meta-Analysis; (4) STROBE Statement - Case Control study, Observational study, Retrospective Cohort study; and (5) The ARRIVE Guidelines - Basic study. Did the author prepare the manuscript according to the appropriate research methods and reporting? Yes, CARE Checklist-2016. 14 Ethics statements. For all manuscripts involving human studies and/or animal experiments, author(s) must submit the related formal ethics documents that were reviewed and approved by their local ethical review committee. Did the manuscript meet the requirements of ethics? Yes. In the section of background, the particularity and rarity of this case should be highlighted. In the section of discussion, since this chemotherapy has been used in ASUC, a specific value and meaning for the treatment of this case should also be highlighted. The diagnosis of ASUC and UC for this case should be consistent in the text.

The authors have done well to incorporate the changes I suggested. However, the case history and past medical history are still not fully lucid to the reader. Please convert dates to years e.g. instead of just writing january 2019, write 2 years ago. At some places, you have used duration and at some places you have used exact dates. This is confusion. If using dates, then report dates as well in current history.
