**Collision carcinoma of the rectum involving neuroendocrine carcinoma and adenocarcinoma: A case report**

Zhao X *et al.* Collision carcinoma of the rectum

Zhao Xing, Gang Zhang, Chun-Hui Li

### Abstract

#### BACKGROUND

Collision carcinoma is a rare histological pattern, and includes two or more different types of tumors coexisting in the same organ as one neoplasm. Different to the combined type, the two adjacent tumors of collision carcinoma are histologically distinct. Collision carcinoma may occur from any origin or organ, including the cecum.

### [Collision tumour of large-cell neuroendocrine carcinoma ...](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4754118>

Here, we report a case of **gastric collision tumour** with large-cell **neuroendocrine carcinoma and adenocarcinoma**. A 71-year-old Peruvian man presented with nausea, epigastric pain, and weight loss for seven months. An Endoscopic evaluation revealed a huge ulcerative and infiltrative mass in the upper and middle third of the stomach.

### Small cell neuroendocrine carcinoma of rectum with ...

<https://pubmed.ncbi.nlm.nih.gov/23556266>

Abstract. **Neuroendocrine carcinomas of the colon and rectum** comprise fewer than 1% of all **colorectal cancers**. These aggressive tumors generally have a poor prognosis compared to that associated with **colorectal adenocarcinoma**. We describe herein the case of a 68-year-old female presenting with a bleeding rectal mass involving the anal canal, which case was associated with hyponatremia due to ...

### Synchronous Collision Neuroendocrine Tumor and Rectal ...

<https://link.springer.com/article/10.1007/s12262-015-1256-1>

Mar 11, 2015 · **Adenocarcinoma** is the most common malignant **rectal tumor**, while **neuroendocrine tumor** (NET) is relatively rare. Due to the endoscopy and **reporting**, the overall incidence of NETs was increasing recently but still less than 1 per 100,000. This means that a combination of an **adenocarcinoma and NET** is a very rare finding and an actual **collision** of these **tumors** even more so.

### Aggressive Neuroendocrine Colon and Rectum Tumors

<https://www.verywellhealth.com/aggressive...>

< Overview Types of Tumors Symptoms Ensuring Proper Diagnosi >

Neuroendocrine tumors are tumors which begin in neuroendocrine cells. They may occur in the digestive tract, the lungs, or the brain. In the digestive tract, they may involve the stomach, the pancreas, the small intestine, colon, and rectum. In the colon and rectum, neuroendocrine tumors account for 2 percent or less of colorectal cancers. Unfortunately, unlike some other types of colon cancer, the prognosis has not changed much in recent ...
